

LEA™

DELIVER AN EXCITING OTT MULTI-SCREEN EXPERIENCE

Now, thanks to LEA™, operators can deliver an exciting over-the-top (OTT) multi-screen experience with state-of-the-art set-top boxes. LEA is an innovative cloud-based software solution that enables Pay-TV operators and MSOs to deploy an immersive, personalized, unified multi-screen experience using existing infrastructure. An OTT plug-in combined with an easy-to-use user interface, LEA offers simple, rapid, scalable deployment.

Discover how LEA can help you transform the user experience.

IN A NUTSHELL

Personalized. Highly adapted to each user's habits and devices, LEA learns, adapts, contextualizes and recommends relevant TV content across devices.

Unified. LEA offers a fully aggregated and unified user experience -- regardless of content source (linear or non-linear).

Intuitive. Thanks to its lively, fluid display, LEA delivers an exciting cinematic experience. Very easy to use, it provides rapid, seamless access to content.

Consistent. As users increasingly watch content in a non-linear fashion, LEA's multi-screen solution ensures a consistent experience across devices.

Scalable. With flexible, open, modular architecture, LEA reduces cost and time-to-market through easy integration into existing video infrastructure. LEA's user interface adapts to each operator's specific identity, content and monetization strategy.

LEA is supported by a full range of Technicolor set-top boxes. All our next generation OTT platforms provide:

- **OTT and Live TV services** over IP/OTT and DVB networks
- **Premium Ultra HD video** content @ 2160p60
- **Best-in-class wireless solutions** over dual-band 2.4/5 GHz IEEE 802.11n/ac solutions
- **Powerful future-proof system resources** with the latest processing power and 3D graphics
- **Latest Operating Systems** including Android and/or Android TV

MediaPlay SKIPPER - over DVB-T/T2/C/ISDB-T networks

MediaPlay DSI859/DSI860 - over DVB-S/S2 networks

MediaPlay DCI860 - over DVB-C networks
